

What are New Notifications Icons

New Notification Icons

New notification icons are designed so that individual users quickly see what a topic's latest updates are. For example, if I'm not interested in any access rights changes to topics, I can select all these topics and mark them unread. Similarly, if I am interested in people's comments, I can choose to view topics where there have been new comments added.

Different Notification Icons

When an item is updated, you will see the New Notification Icon(s) displayed in front of the item name.

Updated By	FR ID	Forum Topic	Cat	P	Submitted On	Initiated By
