

Linking Product Lines to Products

Product Field

Assigning a Product Line to a Product

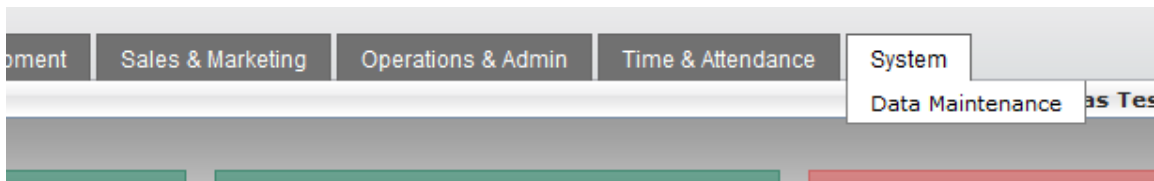

Selecting a Product in Various Modules (BT, PC, PD, QI and TS)

Product Field

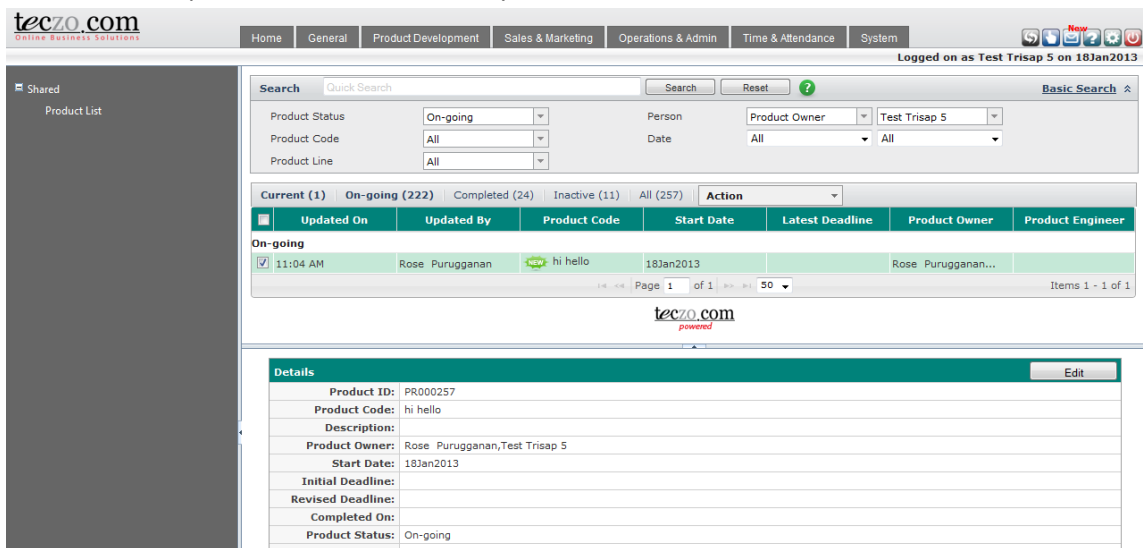

To be able to enable products in various modules such as Bug Tracker, Product Development Tracking, Product Change Tracking, Quality Issues and Technical Support Center, a Product Line should be assigned through Data Maintenance > Products which can be done by the Product Owners.

Assigning a Product Line to a Product

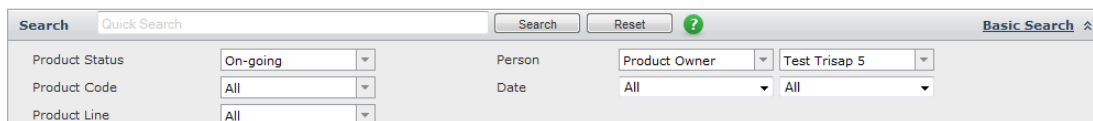

1. Click the Data Maintenance Link under System Category.

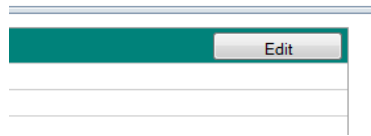

2. Click an owned product from the summary list.

Tip: You may filter the list through Advanced Search to see your owned products.

3. Click the Edit button to open the edit page.

Edit Product - PR000257

Product Code	hi hello		
Description	<p>B I U S [Rich Text Editor]</p>		
Product Owner	Rose Purugganan, Test Tris	Start Date	18Jan2013
Initial Deadline		Revised Deadline	
Product Status	On-going	Completed On	
Product Line	<Select>

Save Save & New Save & Close Back

4. Locate the Product Line field and select a value to assign.

Product Status	On-going
Product Line	<Select>
Product Engineer	<Select>
Initiated By	

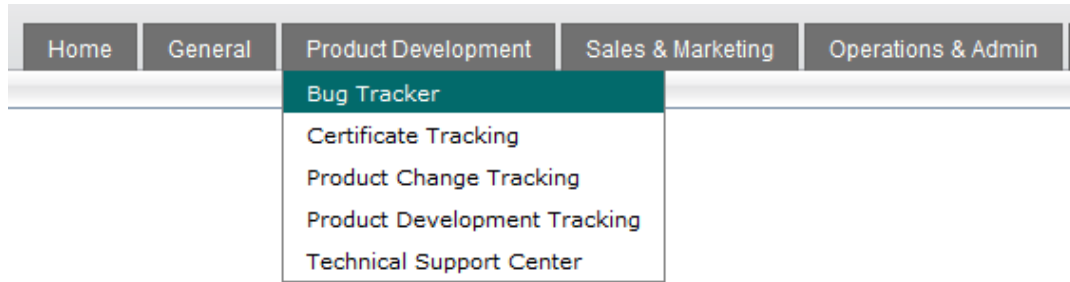

- 123
- Best Sellers
- hi hello
- Ice Cream bebeh
- MyTeczo
- PC-Linked Readers
- PCR
- qq1
- Smart Card Operating systems

Tip: Type the first character of the product to search the list.

5. Click Save or Save & Close to link.

Selecting a Product in Various Modules (BT, PC, PD, QI and TS)

1. Go to a module.

2. Select a record you own or moderate from the summary table.

The screenshot shows the Bug Tracker interface. At the top, there are search and filter options. Below is a table of bug records. The record with ID BT000027 is selected. Below the table, the details for this record are shown, including priority, deadlines, and description. An 'Edit' button is visible next to the details.
